

There's a **simple** solution to **Bowel Control Disorder.**

A B C D E F

It's Secca Therapy.

If you have recurrent problems with bowel control, there is a new treatment option. Secca Therapy is an effective and minimally invasive treatment that bridges the gap between conservative therapies and invasive surgery or implants for BCD (bowel control disorder). Up to 84%* of Secca patients experience significant improvements in symptoms.

YOU ARE NOT ALONE

Bowel incontinence or BCD affects a large population. While it affects both genders, up to one-third of women who have had children may have some level of BCD. Sadly, a large majority (80%*) suffer in silence.

Living with BCD is difficult – the solution doesn't need to be complicated. If your quality of life is compromised by BCD, ask your doctor if Secca Therapy is right for you, or go to secca-therapy.com for more information.

secca®
